

DOORBULT VOERKRALE | POLOKWANE, LIMPOPO

Crop production manager

Take responsibility for the department. Grow with the team.

At Doornbult, crop production is part of a larger feedlot and farming operation. What happens on the farms contributes to the company's feed production and performance.

We are looking for someone with a **strong interest in crop production, a practical approach, and the drive to further develop our arable farming division**. You must enjoy being involved in the fields, but also be able to handle the planning, calculations, and follow-up behind good production.

What you will be responsible for:

- Planning and carrying out maize and silage production under irrigation.
- Soil preparation, planting, fertilizing, crop protection, irrigation, and harvesting.
- Calibration and correct use of planters, sprayers, and other equipment, in cooperation with the workshop.
- Managing staff, inputs, production costs, and records.
- Planted pastures, backgrounding cattle, and sheep.

Crop farming remains the core of the farm. Grazing and the livestock component take up a smaller part of your time, but require regular supervision and good planning.

We are interested in someone who asks questions, investigates problems, and can apply recommendations in a practical way. You should be able to clearly lead your team and take responsibility for the quality and timeliness of their work.

A relevant agricultural qualification and practical experience with irrigation, maize, or silage will count strongly in your favour. **Candidates who are ready to grow from an assistant or supervisory role to greater responsibility are also encouraged to apply.**

We want to strengthen our management team and help our people grow through appropriate training and development. We're looking for someone who wants to be part of that process and bring the same mindset to their own team.

Applications from all over South Africa are welcome. The position is based in Polokwane.

Send your CV, two contactable references, and a short description of your practical production experience to **doornbult@gmail.com**. Indicate your availability and expected remuneration.
